

Add an email account on your iPhone, iPad, or iPod touch

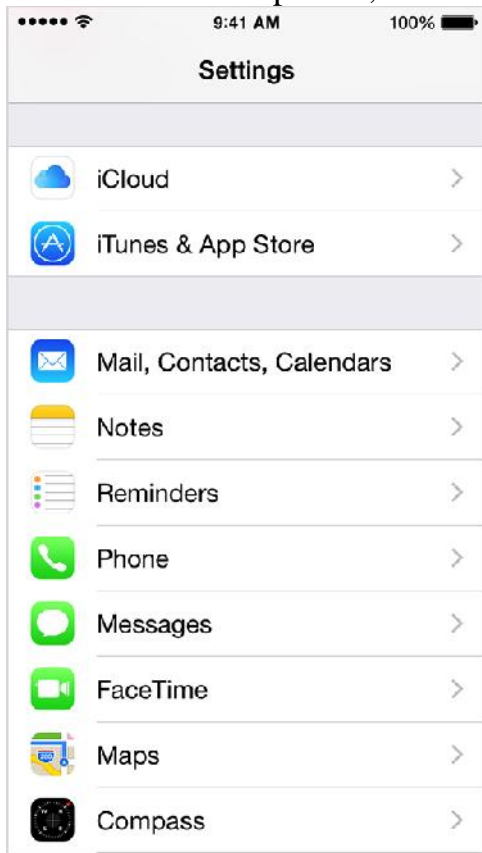

Learn how to add one or more of your email accounts in Mail on your iPhone, iPad, or iPod touch.

Add an email account on your iOS device

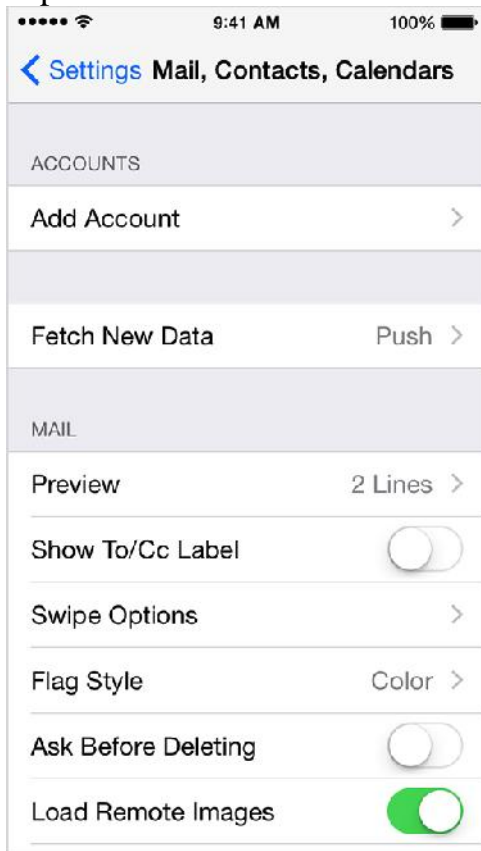

1. Tap Settings.

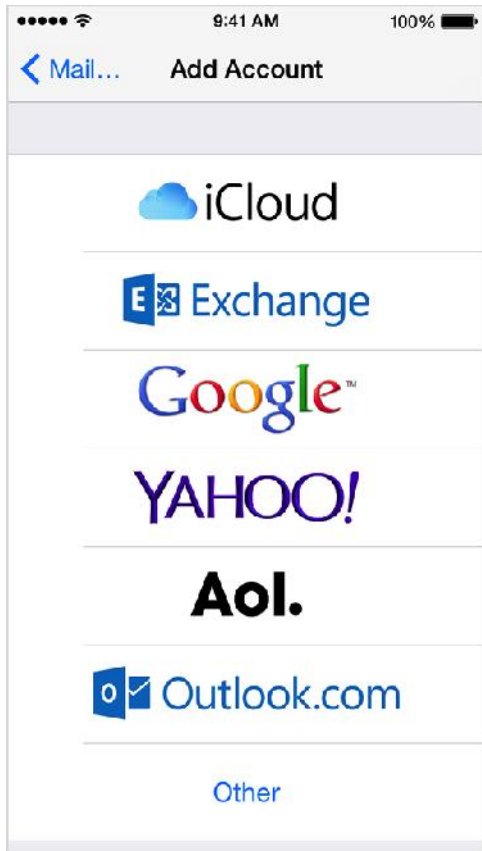

2. Scroll down and tap Mail, Contacts, Calendars.

3. Tap Add Account.

4. Select your email provider. If you don't see your email provider listed, tap Other > Add Mail Account.

5. Provide the required information to finish adding your account.

If you use a common email provider, your device will load your email settings automatically. If your device doesn't load these settings and you don't know them, contact your email provider and ask for this information:

Default Settings

Incoming Mail Server: **mail.yourdomain.co.za**

Outgoing Mail Server: **mail.yourdomain.co.za**

User Name: **name@yourdomain.co.za** (full email address)

Password: **The password you selected**

SMTP Port: **25 or 587** (*We recommend 587*)

POP3 Port: **110**

IMAP Port **143** (*Recommended if using multiple devices*)

In your email program, you must select the option that outgoing mail requires authentication, then select to use the same username and password as the incoming mail server.

**** On an iPhone! Descriptions : www.yourdomain.co.za**
